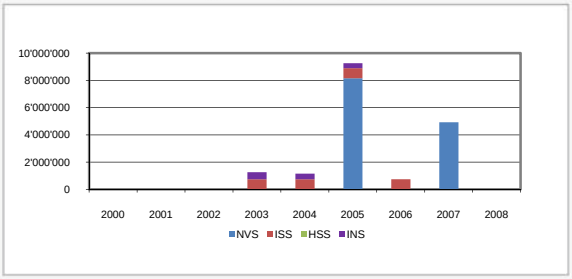
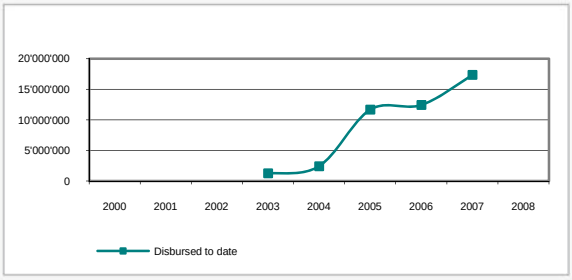
GAVI ALLIANCE SUPPORT

	TOTAL VALUE OF SUPPORT, US$
Hepatitis B vaccine (NVS)	- -
Pentavalent vaccine (DTP3+HepB+Hib) (NVS)	79,681,000
Vaccine introduction grant	100,000
Injection safety (INS)	1,476,000
Immunisation services support (ISS)	6,015,500
Health system strengthening (HSS)	- -
Total	87,272,001

Support disbursed (US$ – by year and type of support)

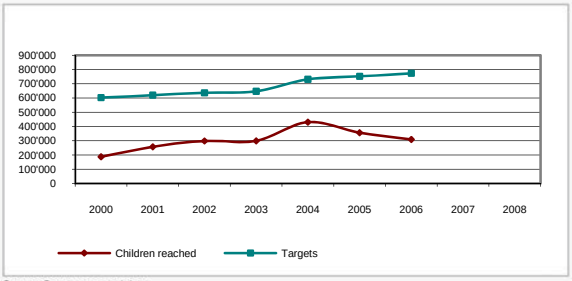


Support disbursed (US$ – cumulative)



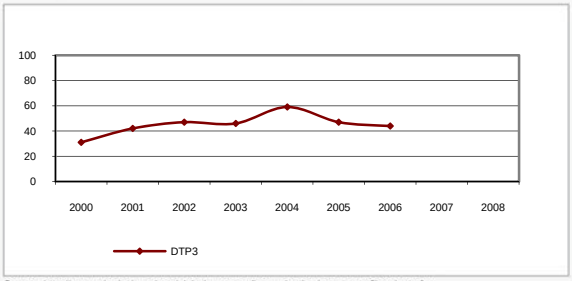
COUNTRY OUTCOMES

Number of children reached (DTP3)



Source: Country reported data

Coverage achieved – GAVI-supported antigens (%)



Source: http://www.who.int/vaccines/globalsummary/immunization/countryprofileselect.cfm

SELECTED INDICATORS

HEALTH SYSTEM INDICATORS

% districts reporting at least 80% coverage (DTP3):	4
% districts reporting less than 50% coverage (DTP3):	66
% dropout DTP3 vs. DTP1:	33
% districts supplied with sufficient numbers of autodisable syringes:	100
Health service providers/1000 population:	1.6
Total government expenditure on health as % of GDP:	1.8

FINANCIAL SUSTAINABILITY

% immunisation spending financed by government:	15
Line item in national budget for vaccines:	Yes
% routine vaccines funded by government:	67

GAVI ALLIANCE

The GAVI Alliance is a partnership dedicated to saving children's lives and protecting people's health through increasing access to immunisation in poor countries. Harnessing the strengths and experience of multiple partners in immunisation (WHO, UNICEF, the World Bank, the Bill & Melinda Gates Foundation, NGOs, developing and developed country governments and developing and developed country vaccine industry), the GAVI Alliance provides poor countries with catalytic financial aid and other assistance.
