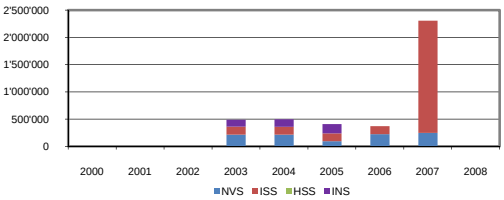
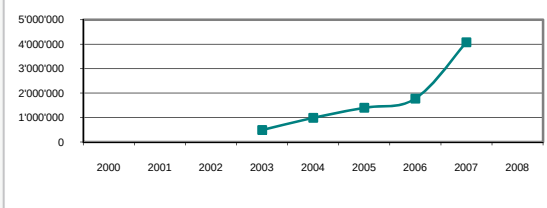
GAVI ALLIANCE SUPPORT

	TOTAL VALUE OF SUPPORT, US $	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
Hepatitis B vaccine (NVS)	- -																
Pentavalent vaccine (DTP3 + HepB + Hib) (NVS)	17,463,000																
Yellow fever vaccine (NVS)	3,168,000																
Vaccine introduction grant	225,000																
Injection safety (INS)	413,500																
Immunisation services support (ISS)	3,951,500																
Health system strengthening (HSS)	- -																
Total	25,220,531																

Support disbursed (US $ – by year and type of support)

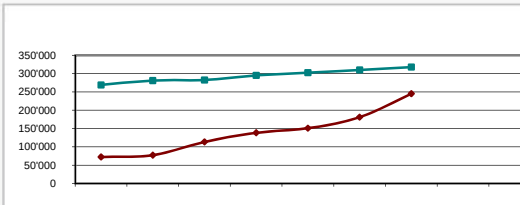


Support disbursed (US $ – cumulative)



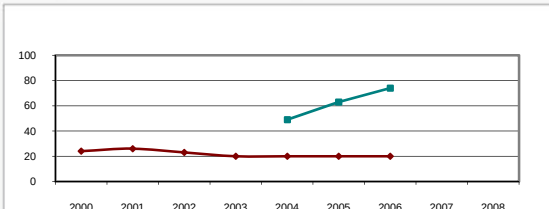
COUNTRY OUTCOMES

Number of children reached (DTP3)



Source: Country reported data

Coverage achieved – GAVI-supported antigens (%)



Source: http://www.who.int/vaccines/globalsummary/immunization/countryprofileselect.cfm

SELECTED INDICATORS

HEALTH SYSTEM INDICATORS

% districts reporting at least 80% coverage (DTP3):	43
% districts reporting less than 50% coverage (DTP3):	22
% dropout DTP3 vs. DTP1:	21
% districts supplied with sufficient numbers of autodisable syringes:	100
Health service providers/1000 population:	0.4
Total government expenditure on health as % of GDP:	3.7

FINANCIAL SUSTAINABILITY

% immunisation spending financed by government:	26
Line item in national budget for vaccines:	Yes
% routine vaccines funded by government:	55

GAVI ALLIANCE

The GAVI Alliance is a partnership dedicated to saving children's lives and protecting people's health through increasing access to immunisation in poor countries. Harnessing the strengths and experience of multiple partners in immunisation (WHO, UNICEF, the World Bank, the Bill & Melinda Gates Foundation, NGOs, developing and developed country governments and developing and developed country vaccine industry), the GAVI Alliance provides poor countries with catalytic financial aid and other assistance.
